

# Setting up your **Visual Studio** on Windows

## 1. Creating your first project

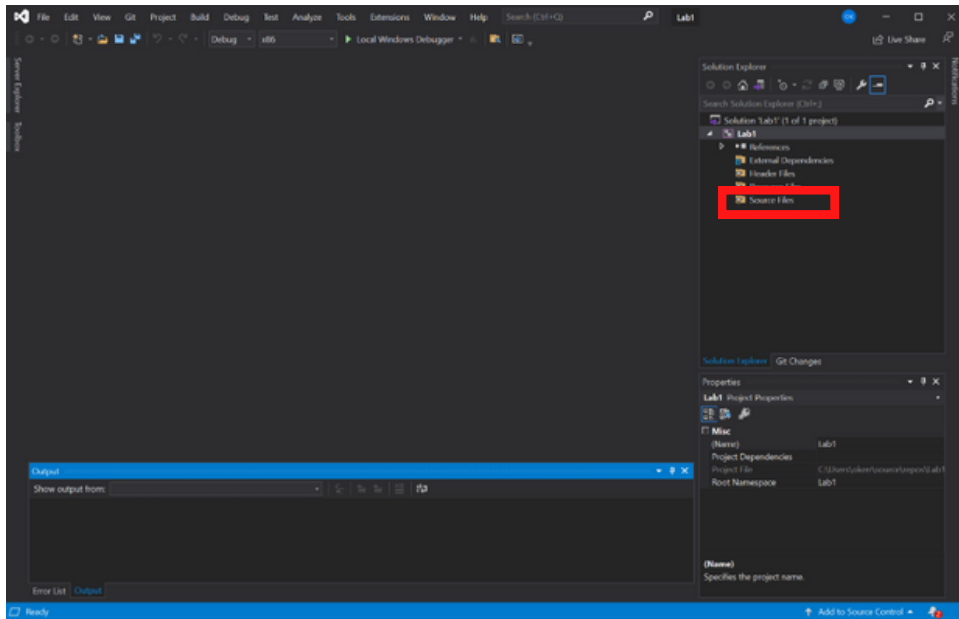

Each time you will have to **create a new project**. There are multiple options on the first page. Hence, it is important to follow a each and every step in setting up your first project.

In order to new project:

- 1) **Open Visual Studio** and choose **Create a new Project**.
- 2) **Choose C++** as programming language in the check box. Next, choose **Empty Project** and Click on the **Next**.

- 3) Enter the **Project Name** and Continue to open the next Screen ↓.

4) Right Click on **Source Code** > **Add** > **New Item**

5) Click on **C++ file (cpp)** and click on **Add**. Finally, you will get the code Editor screen, where you will be able to start programming.

**Good Luck  
Start Programming!**
